Peab builds homes in Ski

Peab has been commissioned to build the first stage of the new heart of central Ski, Sentrumskvartalet. The customer is Stor-Oslo Eiendom and the contract is worth NOK 310 million, which corresponds to SEK 325 million.

The first phase of construction comprises two buildings with a total of 80 apartments, a parking garage and commercial space totaling more than 10,600 m^2.

Sentrumskvartalet is located between the railway station and the shopping center in Ski and will be a vibrant district where housing, shops and restaurants are combined with green areas and meeting places. A total of around 270 homes and commercial premises are planned in several construction stages.

"We're very proud of the confidence placed in us by Stor-Oslo Eiendom. This is a major residential project that matches our expertise and experience perfectly. We're particularly pleased to be part of a project that has already been so well received in such a demanding housing market," says Magnus Taugbøl Brekke, Region Manager Peab Norway.

"We're now taking an important step from planning to construction. The new city center will provide Ski with new housing, commercial premises and great meeting places. We look forward to realizing the first stage of the project together with Peab," says Nikolai Olsen, Project Manager at Stor-Oslo Eiendom.

The project is a turnkey contract. Construction is scheduled to start in December 2026 and is expected to be completed in the summer of 2029.

The project will be order registered in business area Construction in the fourth quarter 2026.
