## Peab builds high school in Enköping

**Peab has been commissioned to build the new Westerlundska High School in Enköping. The school will be completed in May 2024 and the contract is worth SEK 405 million. The customer is Enköping Municipality.**

The new school will have room for 1,600 students and 200 teachers and other personnel. The school will be three stories in three buildings where common functions like the entrance hall, reception, aula, library and cafeteria will be concentrated to one of the buildings. The other buildings are designated quieter study environments. Two green inner courtyards with different designs will link the buildings together.

The school will be thoroughly characterized by natural and robust material with a timber frame and a brick facade. The beams and pillars of the timber frame will be highlighted in the interior of the school and supplemented with a color scheme on the walls and floors that follows Enköping Municipality's guidelines for educational environments. The entire project will be permeated with sustainability.

"We look forward to building the new school for Enköping's high school students and we're glad that the municipality has put such an emphasis on sustainability and climate," says Nils Staffansson, Region Manager Peab.

The project is a turnkey contract that will be turned over to the customer on May 1, 2024.

The project will be order registered in the first quarter 2021.
