Peab renovates sections of University Hospital in Umeå

Peab has been commissioned to renovate sections of the University Hospital of Umeå (NUS). The customer is Region Västerbotten and the contract is worth SEK 297 million.

Buildings 4 and 10 will be modernized and made to better suit the healthcare provided there.

“I’m very proud of how well we work together with Region Västerbotten and that we can with local resources renovate such an important function in society as the University Hospital of Umeå. In recent years we’ve worked at NUS in various projects, which has given us a lot of good experience in the logistics challenges of building while existing operations are going on there,” says Susanne Hallberg, Region Manager Peab.

“From the Region’s perspective it feels fantastic to start up this project. These are longed for premises centrally located in the hospital. We already have world class healthcare and being able to provide it in top quality rooms is even better. Doing this together with Peab feels safe and secure,” says Lukas Bergner, Project Manager at Region Västerbotten.

The project is a turnkey contract in partnering. Construction will start in the autumn of 2023 and the project is expected to be completed and handed over in the spring of 2025.

The project will be order registered in the second quarter 2023.
